

# Open Issues in Multidisciplinary Breast Cancer Management

*Director: G. Ausili Cefaro*

March 30, 2012

**Friday, January 27**

**8.30 Registration**

**8.45 - 11.00**

**Introduction** SERIE DI RELAZIONI SU TEMA PREORDINATO

Giampiero Ausili Cefaro, Chieti

**Breast cancer imaging** SERIE DI RELAZIONI SU TEMA PREORDINATO

Marzia Muzi, Chieti

**Neoadjuvant therapy** SERIE DI RELAZIONI SU TEMA PREORDINATO

Teresa Gamucci, Frosinone

**Nipple sparing and skin sparing mastectomy** SERIE DI RELAZIONI SU TEMA PREORDINATO

Alberto Luini, Milan

**Radiation therapy and breast reconstruction** SERIE DI RELAZIONI SU TEMA PREORDINATO

Luigia Nardone, Rome

**11.00-11.30**

**Coffee Break**

**11.30-13.00**

**Multidisciplinary treatment of ductal carcinoma in situ** SERIE DI RELAZIONI SU TEMA  
PREORDINATO

Cinzia Aristei, Perugia

**Treatment of very young women SERIE DI RELAZIONI SU TEMA PREORDINATO**

Marina Guenzi, Genoa

**Treatment of very old women SERIE DI RELAZIONI SU TEMA PREORDINATO**

Lazzaro Repetto, Rome

Giampiero Ausili Cefaro, Chieti

**13.00 - 14.00**

**Lunch**

**14.00-16.00**

**Treatment issues of HER2+ breast cancer SERIE DI RELAZIONI SU TEMA PREORDINATO**

Marianna Trignani, Chieti

**Treatment issues of triple negative breast cancer SERIE DI RELAZIONI SU TEMA PREORDINATO**

Paolo Pronzato, Genoa

**Treatment of oligometastatic disease SERIE DI RELAZIONI SU TEMA PREORDINATO**

Giovanna Mantini, Rome

**Treatment issues of ER+ metastatic breast cancer SERIE DI RELAZIONI SU TEMA**

**PREORDINATO/verifica con questionario**

Giuseppe Naso, Rome

**16.00- 16.30**

**Discussion & Conclusions**

## **Razionale**

Breast cancer represents one of the most serious problems of oncology, representing the leading cause of death of women in many countries. The course will consolidate and integrate the varied aspects of the multidisciplinary care of breast cancer of main interest to surgeons, radiotherapists, medical oncologists, endocrinologists and cell biologists working in this field.

Particular attention will be given to the diagnosis and management of early and locally advanced breast cancer, focusing on new neoadjuvant approaches, issues related to nipple sparing and skin sparing mastectomy as well as how to best integrate radiation therapy and breast reconstruction.

A very interesting session of the course will cover the current controversies in the treatment of ductal carcinoma in situ, where still no consensus has been reached on optimal management, and issues related to the multidisciplinary treatment of very young and very old women with breast cancer.

Specific focus will be devoted to the current status and advances in management of hormone responsive disease, of the HER2 positive breast cancer in the different clinical scenarios, triple negative disease in the adjuvant setting as well as in the advanced setting.

The meeting beyond providing breast radiologists, radiotherapists, medical oncologists, surgeons, and fellows with an exhaustive overview on the various aspects (biological, molecular and therapeutic) linked to breast cancer management, will provide also them with the opportunity to highlight progress and discuss the still controversial aspects with the recognized experts in the individual ones.
